Rapid innovation
In fast-paced industries, a day makes a huge difference. That’s why we developed LaunchPad, our rapid innovation and prototyping centre, which can design and create packaging prototypes in a single day. Simply arrive with an idea and leave with a working model to test - without the months of waiting your industry doesn’t have.

It’s the best-kept competitive secret of some of the world’s best brands, creating over 2,500 new products a year - now yours for the taking.

Global Strength
Wherever you’re planning to go, there’s a good chance we’re already there. We manufacture in seven countries, source our stock from every corner of the globe, and hold approximately 50,000 pallets of stock on hand at all times.

With a global supply chain management team tasked exclusively with managing DIFOT for our clients (currently hitting 98% and on our way to 100%) and all major accreditations in place, such as BRC, ISO and HACCP, if you need quality delivered to your corner of the globe, we can do it.

Quality you can count on
Quality to us means perfection, not ‘near enough is good enough’. That starts with global colour and printing standards so high you wouldn’t be able to tell the difference between products manufactured in Adelaide from those in Ho Chi Minh City.

It works by consistently operating 99.99% defect-free, with constant improvements to catch that remaining 0.01%.

And it’s proven, by our long-standing relationships with market-leading brands including McDonald’s, Starbucks, CSR Sugar, Goodman Fielder, and Jollibee.

Ready to go range
With over 500 products in our ready-to-go range, there’s a good chance if you need any of the below, they’re ready to go right now:
- Bags
- Cups and cup accessories
- Plates, bowls, and cutlery
- Cartons and trays
- Napkins
- Wraps

And because many are available in plain or subtle designs, you can easily add finishing touches like ties, labels, and stamping to make them part of your brand.

Real responsibility
Corporate social responsibility can be a box-ticker, or it can be a genuine desire to take care of the communities and environments in which we operate.

As a family-run business, we take this part of our business just as seriously as we do our packaging — providing the largest environmentally friendly paper and cardboard range by an Australian manufacturer, with over 200 biodegradable products in stock, so you can always make the responsible choice too.

We were one of the first signatories to the Australian Packaging Covenant, have accredited responsible manufacturing processes, and invest in communities surrounding our factories.

So, yes, we’re responsible. Really.

Award-winning
Since 1948, we’ve proudly won over 40 industry accolades for outstanding design, print, service and sustainability. Most recently, we’re proud to have received the Sustainable Packaging Excellence Award from the Australian Packaging Covenant Organisation (APCO), Supplier of the Year Award for KFC, Pizza Hut, Carl’s Jr, and Starbucks in 2017, Employer of Choice in 2016, 2017 and 2018, and Good Design Awards in 2015 and 2017.

It’s not all about us though; these awards help us attract and retain the most talented minds in the packaging business — and that’s what keeps us creating the solutions that will help you shine too.

WHY CHOOSE DETPAK?
SMART CHOICE CHECKLIST

Your packaging represents your brand. When choosing a packaging specialist, ensure they make your brand shine by ticking these boxes:

- Ability to deliver prototypes within one day to get your products to market sooner.
- Global supply chain with production capability spread across multiple countries.
- 99.99% defect-free rate to protect the consistency of your brand.
- All major food safety accreditations, including BRC, ISO, HACCP, and AIB.
- Trusted to deliver by the world’s best brands, including McDonald’s, Starbucks, KFC, and Disney.
Food is an experience that starts long before we take the first bite. Our senses respond to the sights and smells of delicious food and increase our enjoyment.

Detpak’s bakery and patisserie range is designed to extend this experience for your customers. Bread stays deliciously crusty, intricate icing is protected in transit and muffins can be easily admired through our product windows. Your customers will get the full experience, well after your food has left the store.

200 YEARS IN THE MAKING
Cupcakes have evolved around the world since 1876 when they appeared in the first American cookbook. Inspired by the popularity of cupcakes, Detpak’s cupcake range includes interchangeable, separate cupcake holders that fit neatly into a single box. Simple and effective, this design has the added benefit of packing flat to reduce storage requirements in-store.

TEMPTING THE SENSES
The widely used window retail bags are becoming more popular with Detpak customers searching for a more sustainable packaging solution. The window displays the food products on the shelf for customers to see what they are buying while the brown kraft offers a more natural packaging look. The retail window bags are widely used by Detpak customers for cookies, doughnuts and muesli, as well as many other products.
Just like the perfect coffee, our packaging brings together science and art. Detpak’s café and coffee ranges solve the many technical challenges of insulation, maintaining freshness and sustainability, without compromising on beautiful design.

Our range of cup insulation options helps coffee to stay at the perfect temperature while keeping your customer’s hands cool. For customers wanting the perfect at-home coffee experience, Detpak’s self-standing retail bags with a resealable tie-tie will keep beans fresher for longer.

**COFFEE IS SERIOUS BUSINESS**

We consume more than three kilos of coffee beans per person each year – that’s around 500 single shot espressos and a lot of coffee cups. Detpak has been leading the takeaway coffee cup market since introducing the paper and board Ripple-Wrap™ hot cup in 1999. This ground breaking product includes a corrugated outer wrap that creates air pockets to improve insulation, keeping consumers’ hands cooler.

**HOT AND COLD**

Flexibility is an important quality in any business. Detpak offers a variety of packaging options, including the Uni-Cup. The multi-purpose Uni-Cup has been painstakingly designed to perform well with both hot and cold products, so you can switch easily from soup to salad.
Mobile food vending is an effective way to serve food in temporary environments like music festivals, community events, or even weddings and birthday parties. Most importantly, they’re fun!

Mobile food vendors and food trucks are known for serving high volumes of delicious food with authentic flavours across a broad range of cuisines. In high-pressure situations, mobile food vendors need reliable packaging that functions without fail. Detpak’s wide range suits all cuisine types. In cost-effective, versatile options.

**PLATING UP IN PAPER TIPS**

Be confident your packaging is made to withstand whatever you’re putting in it. Hot and greasy food? Make sure it’s grease resistant, and has air vents to prevent sogginess. Cold food? Poly-lined packaging will help protect the food. Your customers will be eating on the go, so make sure it’s sturdy, like Detpak’s Endura fluted board range. Flatter, wider packaging, like Detpak’s lunch boxes and Pail-Paks™ will make eating and serving easier, and allows for better ’plating up’ and presentation.

**SUSTAINABLE CHOICES**

Using sustainable, compostable and recyclable packaging can help give your mobile food business an eco-friendly advantage. If your business has an eco or health focus, be sure your packaging matches. Plate your food up entirely in eco-friendly paper or sugarcane packaging. Be sure to let customers know if it was made from nature, and can be composted (to be truly environmentally conscious, provide a ‘green’ bin for customers to dispose compostable packaging).
Fast food: when every second counts for your customer. Quick service and takeaway restaurants face particular challenges and opportunities with packaging.

A customer’s experience with your food begins with the packaging and first impressions count. Fast throughput often means no time to spare on presentation, so food integrity and looks can suffer. Detpak’s cost-effective quick service range is designed to maintain the integrity of your food within easy-to-assemble packaging. Fast service and good looks equals a great impression.

WHEN TWO BECOME ONE
Pail-Paks™ are a beautiful way to present premium food products and are a modern alternative to plastic containers. Pail-Paks™ have an in-built lid, which eliminates the need to stock and store two packaging pieces in your store – saving space and time. Their innovative design also allows for simple and rapid filling as they stand open on the benchtop for easy access. Pail-Paks™ are easy to carry and great for branding.

’70S ICON STILL PERFORMING
Detpak first started manufacturing waxed burger wraps in the 1970s for McDonald’s: a recent entrant into the Australian market at that time. These burger wraps, with a thick layer of wax on one side, are ideal for juicy burgers. The market has expanded since then and Detpak is now the largest manufacturer of waxed wraps in the Asia Pacific region.
Eating restaurant-prepared food away from the premises is no longer merely about convenience - it’s becoming a luxury for which people are willing to pay a premium. Customers are increasingly time poor, and expect more from their out-of-restaurant dining experiences, so restaurants really need to deliver.

The packaging experts at Detpak can provide tailored packaging solutions to meet your needs, whether your business handles just a few orders a week, or if takeaway and delivery is a significant portion of your restaurant’s income.

**BRANDING MEANS BUSINESS**
Packaging is one of the best value forms of communicating with your audience, your customer. Beautiful food deserves beautiful packaging, so consider custom print options like the ‘Branding Belt’ (pg 72) to inject branding that is versatile for use with plain packaging. Don’t let your customers forget who made their food!

**KEEP FRIES CRISPY**
Detpak’s packaging innovation experts worked with the University of Adelaide to test the crispiness of French Fries from time of packaging until 30 minutes later, in a simulated food delivery while stored at ambient temperature. By exposing the fries to bending, compression and puncture tests, they found the biggest change in fry crispiness happened 10 to 15 minutes after packaging. Choose fry packaging with maximum breathability, like Detpak chip cartons, to preserve crispiness and prevent sogginess.
Strong and sturdy packaging solutions stand out in a crowd. Detpak’s venues and catering range includes products that are tough, designed to hold a wide variety of foods and are easy for your customers to access and carry.

Pre-formed products help to save preparation time, and a range of linings make many of our products suitable for hot or cold foods. This dual functionality and versatility pays off in ease of use and decreased storage needs onsite. Recyclable products, and products made with materials from sustainable sources, are a key feature of this range. Detpak can support sustainability at large scale events, without any compromise in quality.

HALF-TIME HEROES
Large public gatherings like music festivals or sporting events often require extremely fast service. More than 1250 people per minute can be looking for refreshments during lunch at the cricket – and that’s just half the crowd capacity of the Melbourne Cricket Ground. Detpak’s pre-formed food trays help you to package and serve food quickly. With a range of linings designed to handle greasy products, we can ensure each individual customer has the best experience possible, regardless of crowd size.

LEADER OF THE PACK
Detpak’s Endura range is made of tough stuff. Its unique fluted board, a corrugated piece of board between two sheets of paper, gives it structure and the strength to withstand a battering at busy events. Its design also allows it to cope well with grease and oil. Even better, it is 100% renewable and sustainable which makes it a great environmental choice.
RAPID INNOVATION

LaunchPad is Detpak’s centre for concept creation and rapid prototyping, offering lightning-fast turnaround time and maximum innovation.

Come to us with a packaging goal and meet with our team of experts – within one day we will design and create your prototype.

It’s that simple.

Fast tracking a process that usually takes up to 18 months. An amazing advantage in a fast moving market.
Giving back

Appealing to the ethical consumer, a cup from the Detpak Coffee Origins™ Cup Gallery is not just a great-looking way to serve a hot drink, it will bring customers closer to the origins of their coffee. Featuring vivid imagery inspired by the architecture, textiles and traditions of coffee-producing nations.

Detpak are working with charities around the world to support positive social change using the power of coffee. With every purchase of the Detpak Coffee Origins™ Cup Gallery, we are contributing to improving the health, education and food security of families in rural coffee growing communities around the world, with five per cent of Coffee Origins™ sales contributed to our partner organisations.

Supporting our people

Corporate social responsibility is a big phrase for a very simple idea - taking care of the community in which we operate. Detpak is proud to take care of its community and welcomes the regular social accountability audits from many of our global customers. We focus on areas including fair hiring practices; safe working hours; fair compensation and benefits; and workplace safety in all of our manufacturing facilities. Detpak makes sure that its team is paid at, or above, award wages for normal time and overtime, whether they are in Adelaide or Ho Chi Minh City.

We invest in the local communities surrounding our factories through sustainability projects and infrastructure and support many charities, including Ronald McDonald House, the Breast Cancer Council, Oxfam and the Red Cross.

Passion for paper

Detpak South Africa is helping a group of entrepreneurs in a struggling community explore their passion for paper. The group is running a hand-made paper bag business that aims to create jobs and a sustainable income for under-privileged people in their area.

Detpak has been with the business from the beginning, by helping to fit-out the workspace and purchasing the raw materials needed to get the business going, as well as donating paper. Detpak’s support is ongoing and we look forward to the difference this group makes to their community in Johannesburg.

Smart kids, strong future

A Heshan government program in China - Care and Help our Kids - helps teenagers with good academic ability that are experiencing difficulties in life. Detpak is sponsoring a teenager through this program to help him overcome these difficulties and create a brighter future. As a result of our sponsorship and his hard work, the young man is now majoring in Industry and Commerce Management at University and gaining valuable business experience working in the local Detpak factory during his study breaks.
Sustainable Raw Materials
Detpak assesses everything that goes into manufacturing our products for its environmental impact. Detpak only uses paper and board from large, reputable raw material suppliers – meaning no old growth forests are used.

We keep the use of inks and adhesives to a minimum and we also prioritise the use of water-based and soy inks. These are more environmentally friendly than solvent based inks as they use less non-renewable resources.

Responsibility Manufacturing Practices
We continually assess our manufacturing practices to make our processing as sustainable as possible. We minimise our inputs where possible which includes reducing our use of power and our use of solvent based inks and adhesives. We also maximise the re-use of production set-up materials.

Detpak takes into account its own level of packaging and we minimise the amount of outer packaging on all of our products to customers. Our waste is always disposed of in line with Environmental Protection Agency (EPA) approved practices.

SUSTAINABLE MATERALS
- We promote the recovery and recycling of used packaging.
- We keep the use of polymers and adhesives to a minimum.
- We re-use production set-up materials.
- We recycle paper waste in our plants.
- We keep the use of water-based and soy inks.
- We are consistently reducing our use of power.
- Paper is natural, and is a renewable resource.

RENEWABLE MANUFACTURING PRACTICES
- We work with customers on the pros and cons of packaging choices.
- We work with waste management and resource recovery stakeholders.
- We provide advice on packaging to best suit your recycling needs.

PACKAGING CHOICES
- Our I am eco™ range provides greater environmental options.

ENVIRONMENT
- Sustaining our future
- Sustainable raw materials
- Responsible manufacturing practices

End of Life Disposal
Detpak works with waste management and resource recovery stakeholders to develop increasingly sustainable options for product disposal, including diverting products into new recycling streams.

Detpak was also one of the first signatories to the Australian Packaging Covenant, an initiative that encourages businesses to reduce the environmental impacts of consumer packaging. Detpak is proactive in meeting its obligations under the covenant and we promote resource efficient packaging design, the recovery and recycling of used packaging, and reducing the incidence and impact of litter. The Detpak team can advise you on the best packaging options to suit your disposal or recycling needs.

ENVIRONMENTAL CHECKPOINT
To assist you in making a selection that is mindful of the environment, we have rated each of our products throughout this catalogue against 4 key environmental criteria.

- SUSTAINABLE
  - The paper or board material used in this product is sourced from responsible forestry, and the supplier has been audited for evidence of sustainable and ethical forestry practices.

- COMPOSTABLE
  - This product is biodegradable and compostable, and suitable for treatment in a commercial facility where it will break down within 90 days as defined by EU standard EN13432.

- RECYCLABLE
  - This product can be readily recycled via kerbside recycling bins once food residue is cleaned off of the product.

- I AM ECO™ RANGE
  - Detpak’s I am eco™ range of products uses bio-film rather than traditional plastic lining and is 100% biodegradable and compostable.

DESIGN YOUR OWN

BRANDING MEANS BUSINESS.

The biggest brands around the world choose us for their branded packaging. They know that if their branded packaging inspires and influences their customers, their bottom line will benefit. Most of Detpak’s products can be customised to strengthen your brand, and help you stand out from the crowd.

With 70 years of experience in superior design and printing across a range of products, you can trust Detpak to build your brand, and your business.
CUSTOM PRINTING
Most of Detpak’s products can be custom printed with your design or branding to help you stand out from the crowd. Custom printing is often thought of as an expensive option, but there are many ways to maximise your exposure without breaking the bank.

We often recommend that businesses on a budget start with custom printing just one packaging item from our range. An ideal place to start is a carry bag, as it will generally house all of your other items. They are economical, use minimal space in-store, have a low minimum run (starting at 3,000 pieces) and can be used to great effect with a 1-colour print. Carry bags will advertise your business as customers carry them from the store, and are also much more likely to be re-used, extending their lifespan.

Wraps are also a versatile option to add branding to your range. They can be used to line food trays, lunch boxes, pails or serving platters as well as wrapping food. Wraps are very economical, use little storage space and can be easily used in-store and for takeaway items.

Check out detpak.com/design-your-own/custom-print/ for more information.

STOCK PACKAGING
Many of our products are available in plain colours or subtle stock prints that can be easily worked into the décor or theming of your store. Small touches can make these products your own, like using stamps, stickers, ribbons, ties or a Branding Belt.

Stock or generic products are available by the carton, usually with 200–1,000 pieces per carton. This means you aren’t tied up with loads of stock, taking up room and money.

Stamping
Stamping your graphic or brand onto our products allows you to customise your packaging easily and cost effectively.

Branding Belt
Branding Belts are available in three sizes and are an ideal way to add your branding to our plain packaging for Food Delivery.

Stickers
Stickers are a great way to showcase your brand and to seal prepared food for tamper proofing.

Ribbons or Ties
Ribbons or ties are a versatile way to wrap our stock packaging and add that wow factor, particularly for Food Delivery.

NAPKINS
**LUNCHEON NAPKINS**
- Subtle embossing pattern covers entire 1-ply napkin, while 2-ply napkin has embossing only on the edge
- Ideal for everyday use.

**DINNER NAPKINS**
- Large, thick napkin with embossing on the edge
- Ideal for formal situations and premium presentation.

**COCKTAIL NAPKINS**
- Small napkin with embossing on the edge
- Ideal for cocktail food.

**EXACTA NAPKIN**
- An interleaved napkin that fits with a range of dispensers*
- The dispenser ensures that a customer takes just one napkin rather than several at a time, decreasing usage by up to 30%.
* Sold separately. Statements do not apply to Y971P0081 and Y971P0083/P0082

**DISPENSER NAPKINS**
- Economical napkin option
- Fits into standard counter-top dispensers.

Detpak is a member of the Detmold Group, a specialist paper and board packaging manufacturer founded in 1948 in Adelaide, South Australia.

Today the group has a worldwide network with manufacturing in seven countries and multiple sales offices throughout Australia, New Zealand, Asia, South Africa, the Middle East, India, America and Europe.
TIPS AND TRICKS

Detpak offers a comprehensive range of packaging solutions catering to the rapidly growing food delivery sector. Consumers expect high quality out-of-restaurant dining experiences, so businesses must be prepared to deliver.

Read on to discover how the right packaging solution can create a memorable food delivery experience.

#1 PREPARING YOUR MENU FOR THE JOURNEY HOME

Determine which menu items will be offered for food delivery. A pared-down menu featuring items that will not be impacted by the delivery process means customers won’t receive food in poor condition.

From this, carefully consider which packaging items will be needed. Remember, the packaging is the first impression the customer will get of your food.

DID YOU KNOW... Some kinds of packaging can protect food integrity much more effectively than others?

#2 YOU CARE ABOUT THE ENVIRONMENT, AND SO DO YOUR CUSTOMERS

Is your eco reputation important, and something your customers care about? What do they expect from your business?

Using sustainable, compostable and recyclable packaging can help give your business an eco-friendly advantage. It can also help change the opinion that ordering food for delivery is wasteful.

TIP: If your business has a health-focused ethos, plate your food up entirely in eco-friendly paper or sugarcane packaging. Be sure to let customers know it was made from nature and can be composted.
#3 BRANDING MEANS BUSINESS
Packaging is one of the best value forms of communicating with your audience: your customer. If the food is delivered by a third party app or website service provider, it may be your only opportunity to interact directly with the customer. You’ve got them captive, so take the chance to send a message about your brand.

Simple solutions, like ‘branding belts’, stickers and stamps add a perception of value, and can help recreate the mood of the restaurant at home.

TIP: Beautiful food deserves beautiful packaging. Consider custom print options – or custom print one item, like the ‘branding belt’, that can be integrated with plain packaging.

#4 VALUE FOR MONEY
How much business do you expect to get from food delivery? What investment are you making to ensure the integrity of both the food and your brand?

Consider cost-effective options like products that serve dual purposes (e.g. a bowl that can be used for soup or sauce or a clam that can be split into two). To be sure you’re getting the most out of your packaging investment, choose items available in smaller quantities, and/or are flat-packed for neater, more compact storage.

TIP: Use packaging items that present well in-store that can also be used for delivery. A printed burger wrap can be used for in-store presentation, or for wrapping food or lining a carton for takeaway/delivery.

#5 PERFECT THE PRESENTATION, AND EDUCATE STAFF
Use packaging samples to check how your food sits in it, ensure it won’t move during transport, and will protect product integrity.

Effective packaging solutions should be simple for everyone to use. Make sure all staff who will be handling food know how to package it up.

TIP: Keep a reference photo of how the end product should look before leaving the premises.

#6 GIVE SOMETHING EXTRA TO GAIN AN EDGE
Supplying cutlery and napkins is a must, but to truly delight your customers, elevate their delivery experience. Perhaps include an after dinner mint, wet wipe, or even a personal message from the chef. Other things to consider include space for scrap disposal – for example, chicken wings or ribs can be messy, so make sure cleanup is easy.

TIP: Include cutlery, chopsticks and napkins, as well as fun extras, to ensure a memorable delivery experience for your customers.

#7 PROTECT FOOD INTEGRITY
When a food delivery arrives at its destination, you need to be confident the packaging will have done its job and that food quality will not be compromised.

Hot food: If food is fried and crispy, the packaging should withstand grease, retain heat and resist sogginess. This can be achieved with a lined wrap to provide extra grease resistance, or through innovative ventilation holes and utilizing breathable materials to avoid sogginess. Choosing a food-safe polyethylene lining will help keep sauces and dressings intact – meaning that packaging won’t go soft.

Cold food: If delicate items like cold rolls and sushi will be on the delivery menu, then a polyethylene-lining will protect food and prevent grease stains. If food needs to be chilled, ensure the packaging is freezer proof.

Eating: Will customers be eating straight from the packaging, and can they do this easily? Flatter, wider based products allows for better ‘plating up’ to show off beautiful ingredients, without compromising on convenience.

TIP: Test your first few deliveries on friends so you can be sure the food is arriving in the same delicious state your kitchen sent it out.

#8 THE DELIVERY EXPERIENCE IS AN EXTENSION OF THE RESTAURANT
Look at the delivery through the customer’s eyes. What is their impression of your brand and business? The delivery experience must be good enough that the customer feels it’s worthwhile, and an equivalent experience to going to the restaurant. Messy, unappealing packaging can create an image of unappealing food – you don’t want people thinking “what did I just spend $50 on?”

You want them to remember their experience with you fondly, and know they’ll be encouraged to order again. Packaging is your first and last chance to send a message about what your restaurant stands for.

TIP: Use custom printing packaging to reinforce branding messages and tell stories about your food, like the quality of ingredients, the skill of the chefs, and even menu information. Ensure the delivery is Instagram-worthy, and encourage sharing on social media – include your social media handles in your branded packaging.
