TIPS & TRICKS

Beautiful food deserves beautiful packaging.

Consider custom print options that reinforce brand messages, like the quality of ingredients, and the philosophy of the restaurant.

Value for money is equally important: choose items that present well in-store, that can also be used for delivery, like a printed wrap which can be used for in-store presentation, or for wrapping food or lining a carton for delivery.

Include cutlery/chopsticks and napkins as well as fun extras like mints or a note from the chef to ensure a **memorable delivery experience**.

Ensure the delivery is **Instagram-worthy**, and include social media handles on branded packaging to encourage sharing.
